

CHRIST THE KING COLLEGE

Jhansi

Class 10th Chemistry Project work

Complete your practical file write all experiments as per I.C.S.E syllabus in tabular format i.e experiment/observation/inference. All these experiments are given in front pages of your practical file.

Learn unit : Analytical chemistry by heart, focussing on what do you observe when sodium hydroxide or ammonium hydroxide is added in small quantities and in excess to solution of certain salts. Explain the solubility or insolubility of precipitate in excess of reagent.

Learn unit 1: Periodic properties and trends.

Solve numericals from unit : mole concept learn laws involved and definitions of various terms.

From above units test will be conducted ,Written/Viva.

Phone: 0510-2471873
